Summer 2013

Tech Info!

DuPont™ Kalrez® Dovetail Groove Design

A properly designed groove allows for o-ring expansion.

With Fall just around the corner, we at Bay Seal hope that you're having a fantastic Summer! We've been as busy as ever and are here to help you with all of your sealing needs!

SEMICON® West2013

For those of you not in the Semiconductor and Solar Industries, Semicon West & Intersolar is held in San Francisco every July and is the premier event for new products and technologies for microelectronics design and manufacturing. This year was our 15th year exhibiting, and as always, it was very fast paced and exciting. Some of the key trends from the show were highlighted in an article by Pete Singer, in which he mentions that part of the buzz at the show was the prediction issued by SEMI about the growth in capital equipment for 2014. [You can read the whole article here....](#) Look for us next year, we'll be in booth #922 in the South Hall.

Did you know that our Customer Service Representatives and Warehouse personnel have over 150 years of combined experience!

Just think of all of that knowledge that goes into each of your orders.

Product Highlight

Parker's HiFluor™ Series of highly fluorinated elastomers are a great product if you are looking for a material that's in between a traditional FKM and FFKM. The series is comprised of 3 different compounds with differing features. Download the [PDF](#) to find out if this is just what you need for your project!
